**Calnetix Achieves ISO9001:2015 Certification for Quality Management Systems**

CERRITOS, Calif. – Nov. 28, 2017 – [Calnetix Technologies](http://www.calnetix.com) today announced it has been certified to the new ISO9001:2015 standard, signifying the company’s compliance with the latest international standard for quality management systems.

The certification was awarded by Det Norske Veritas (DNV) following an extensive audit to ensure Calnetix’s quality management policies and procedures meet the strict standards and guidelines under the new standard.

ISO9001:2015 was promulgated by the International Standards Organization (ISO) as a replacement for the older ISO9001:2008 standard. It comes into effect in July 2018.

“Achieving the new ISO certification well in advance of the compliance deadline is an important achievement for our organization. It confirms that we meet the most current quality system standards and ensures conformity and consistency in the products and services we deliver to our customers,” said Vatche Artinian, CEO of Calnetix. “It is an important milestone in our ongoing commitment to our core values of outstanding customer service and responsiveness.”

According to the ISO, the new 2015 standard incorporates important new provisions. Among them are greater emphasis on leadership engagement, addressing organizational risks and opportunities in a structured manner and managing supply chain more effectively.

**About Calnetix Technologies**

Calnetix Technologies, LLC (“Calnetix”), headquartered in Cerritos, Calif., is focused on Innovation That Drives Industries®. The company specializes in high-performance, high-speed motor generators and best-in-class advanced magnetic bearings and control systems. Calnetix’s patented, underlying technologies, which have been in use since the company’s inception in 1998, have made Calnetix a world leader in the design and production of high-speed machines. The company’s overall technology portfolio and system integration capabilities have led to development and production contracts with industry leaders and the start of many successful subsidiaries that focus on unique niche markets.
